ACADEMIC PROJECTS

Oil and Gold Market Analysis

Jan – Mar 2025

B.Sc. Computer Science Project, Fergusson College (Autonomous), Pune | with Saloni Pardeshi | Guide: Mrs. Sujata Sathe

- Collaborated on a market-analysis platform for oil and gold, integrating live financial data with a web dashboard for price charts and indicators (RSI, MACD).
- The project applied predictive-modelling techniques (ARIMA, SARIMA, Random Forest, regression) to forecast oil and gold price movements, evaluated using RMSE and R^2.
- Built foundational skills in commodity time-series analysis that later fed into independent research on regime-switching models for oil and gold futures.
